Response to Arguments

Applicant's arguments filed March 8, 2004, with respect to claims 1-29 have been fully considered and are persuasive. The rejection of claims 1-22 has been withdrawn.

Allowable Subject Matter

Claims 1-29 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 17, and 21 have been amended to include a limitation where a distal end of the discharge electrode section is exposed to air such that electrons are emitted into air. Newly submitted independent claim 29 has been presented which contains at least this limitation.

After further search and consideration, the prior art of record has not been found to teach or suggest the inventions recited in the independent claims. Applicant's arguments regarding the application of the prior art of Fujisawa in the previous Office action are found to be persuasive. Claims 1, 17, 21, and 29 are therefore allowable over the prior art. Claims 2-16, 18-20, and 22-29 are allowable by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2881

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Examiner has further provided a list of US Patent documents considered relevant to electron and negative ion generation in light of the instant application on the form PTO-892.
